ELTECPUR® sport

Exercise Mats and Exercise Mats HD

STURDY AND HARD-WEARING FLOORING FOR THE FITNESS AREA

The material properties of our ELTECPUR® material make it a versatile product that can be used in the areas of fitness and sports as well. Its elasticity and impact resistance in particular, plus its durability and eco-friendliness all play a decisive role. The sturdy and water-resistant ELTECPUR® sport Fitness Mats are made of high-quality PU-bonded recycled rubber granules and are the ideal floor covering for the fitness area and other recreational facilities such as trampoline parks, skating rinks and equipment rooms.

ELTECPUR® sport Exercise Mats prevent training equipment from slipping and protect the floor underneath from the impact of the weights. Some additional advantages of our products are their sound-absorbing and vibration-reducing properties, and they are joint-friendly as well. ELTECPUR® sport Exercise Mats are suitable for both indoor and outdoor use, and offer reliable and low-maintenance protection for many years to come.

HET
ELASTOMERTECHNIK
QUALITY AND SERVICE – OUR KEY TO SUCCESS

The difference between ELTECPUR® sport Exercise Mats HD and ELTECPUR® sport Exercise Mats is that the HD Mats are made with finer rubber granules and are even more densely compressed. At HET, HD stands for high density and characterizes our premium products. The use of finer rubber granules gives the surface a smoother appearance. They were specially developed for the design and installation of floors in the area of fitness (such as cross-fit, equipment training. or in the free weights area) and weight training. ELTECPUR® sport Fitness Mats measure 100 x 50 cm and ELTECPUR® sport Fitness Mats Plus 200 x 100 cm. Additional versions and sizes available upon request. Depending on the version, they contain a percentage of colored EPDM rubber granules. The standard selection includes four different EPDM colors and five different color densities:
